

Foundations – Schoolwide Positive Behavior Support

Foundations guides school teams through the process of designing a proactive and positive school-wide discipline plan that supports the school in staff development, effective behavior management and motivation practices as well as behavior support for all students.

Anticipated outcomes of the implementation include:

- a reduction of unnecessary discipline referrals
- improved school climate
- enhance school safety
- increased positive interactions between staff and students
- improved staff skill in effective supervision and positive behavior support

All of these outcomes are based on the use of data-driven decision-making regarding ***behavior and discipline practices*** within the schools.

Schools who adopt this approach to positive behavior support ***learn*** a systematic process of reviewing and, as necessary, revising the schools' discipline and behavior support policies and procedures.
